DRAWING—ARCHITECTURAL and ME-GHANIGAL—As this is the season for young mechanics and others to apply themselves to the attainment of the greatest aid to the engi-neare in their various pursuits, via:—a thorough knowledge of Geometrical Drawing.

We would call their attention to "Manifie's Text Book of Self-instruction," being a complete manual of Mechanical Drawing, including Geomet-rical Drawing and Perspective, illustrated with 56 steel phates, and explained in a familiar mainter, rendering the attainment of the art easy and agree-able.

From the New York Scientific American.

"It is the best work on Drawing that we have ever seen; no young Mechanic such as a Machinist, Engineer, Cabinet Maker, Millwright or Carpenter, should be without it." From the Baltimore Western Continent.

From the Basicane is return comment.

(a He, who having theroughly mastered this book counter taske hars of the ordinary drawings of this kind, may well despair of ever being able to accomplish such a result.

From the National Intelligences.

From the National Intiligencer.

Indeed, one who patiently and carefully goes through it could not be said, so far as principles and methods are concerned, any longer to want a master."

master."

From the American Railroad Journal, to it is contamined to those test quantum of judge of its merits, as being the most thorough and complete work of the kind ever published in this country."

"It has received universal commendation from the press, and we believe that it merits all that has been said in its praise. Price \$2,00.

DR. CORBET'S HIGHLY
CONCENTRATED SYRUP OF SARSAPARILLA.

It is a undeniable fact that no medicine ever
brought before the public, has proved so beneficial
in case of discussal Blood, Liver Obstruction,
Secondard Thiat, Consumptive Habd, and all
cutaneous affections, as that of Dr. Corbet's 1—
The distinguished Prof. Hayes says:—att. ought
to have a preference, as the formain exhibits the
main of some of the best of our mative medicinal
roots and plants with solutaness of the highest
repute as temedial agents, and does not include
any Metallic Compound.

But recal whan Dengglets say, whose well known
characters give the asserties to its virtues.

The Compound Concentrated Syrup of Sarsaperilla, made by the United Society of Cantelbury,
is prepared with great care, and the increasing demand for it is positive proof of its good effects. It
is now prescribed by most of the Physicians in
Boston and clawbure, which is the hert evidence
that they give it a preference over any other preparation of Surasparilla offered to the public.

Since its involution, its reputation has been
constantly increasing, and its popularity extending
in every direction, heing recommended by most
distinguished physicians.

Mr. Uswie—Dear Sir: I rould send you a dozen certificate; strong and decisir, of the really sanative effects of your valuable Balancof Wolf Cherry, within the past tweive months, under my own supervision and direction. Indeed, I know of few persons who have used it, comparatively, but commend it in the strongest terms. A case of Asthma, the scient I can sus, to which I was called a month agr, eximed the superiority of the Haleson. This discuse lasted six weeks, and the dyspec, and ruffering were decodingly less at an every night.—The gentleman told one to give him something to had him home, (2I miles,) so that he might see his wife and child, and die in peace! I gave him one leathe of the Balaam, and four ounces of syrup squille, directing him to take tex-reponded dozes of lest Bordeaux dive oil, when the difficulty of hiresting was proatest. Next day I forest his deepondent will, and made him take six battles of History's Holeans of Wild Chery home with him on a present, he lraving alleged that he had used so moch expensive medicine to un profit. Last week Mr. A called and expressed his grottude to me in the warmest moner, said the medicine knd such sin (1st), and well kill, and took six battles made leit my offue for home, rejecting.

House.-The House met at the asual hour, when the clerk connuenced reading the journal.

Mr. Hall rose and inquired under what anthority the proceedings were made up. He said that he had no idea of a clerk being foisted upon the House as the doorkeepsr was.

The chair ruled that it was proper, and the proceedings here ended.

Mr. Harris, of Librois, moved that the House do now proceed to the election of cluck.

Mr. Brown, of Miss., effered an amendment rescinding the resolution in reference to the domkerper, which was ruled out. Mr. Brown appealed, and the decision of the Chair was sustained.

Mr. Harris's resolution was then adopted and the following acminations where made -Messrs. Prindle, Young, Walkridge, Siom, Brenner, Porney Brick, Smith Forsyth, Monthead, Mead and Walker, The election is now proceeding, ...

MEAT BREAD .-- The following account of an alleged new discovery is from the Washington correspondence of the N. Y. Journal of Commerce :

"A pumphiet was laid on the tables of the Senature to-day, which relates to an old topic revived—the art of living without eating. It is a letter fram G. Borden, Jr. of Galvesion, to Dr. Anhbel Smith, setting forth his invention in the preparation of an meticle of foud termed meet biscuit, and the verity of Br. Smith thereto.

Mr. Borden claims to have invested a new ands of concentrating the nutritive essences of most in a small compass. He preserves the essence of meat, fewl fish, &c , in combination with flour or meal, by drying or baking. He prepares genuino turtle soup in this way. It is and scorbutio, and therefore will suit for use in California. It is recommended for unvelors, as well as for explorers, surveyors, a say and marine service, and economical use in families. The most breed is made of fat and well condiof error og amed secent but sleming beneit: the composition of the bread.

This field of science has been heretofore and long ago, fully explored; and it is daubtful whether Mr. Horden has discovered anything new under the sun. Dr. Smith, however, speaks highly of the inable form, all the austilive portions of ani mil and farinaceous food. The soup made from it he says, that the fresh, lively, clean and thoroughly done or cooked flavor, that use to form the charm or the soup of the Rother de Cancala! The sour is ready to be abserved into the system without loss, and without tedious digestion in the alimeninty canal. So attence, is the world to be freed from dyspensio, and from the labor and expense of culinary preparations,-The disunvery is unite just in time. Dr. Smith minks, in Ireilitzie ibn gettlement of Gregor, and a direct communication overland, with the Californias, and over Pacific regions. A pound-of biscuit in three days is emple for one man. Three hundred pounds is an ordinary muls load. It is the true marns of the desert. A small and municitary flame will supply fuel for cooking. It will shorten ware, and promote civilization. It will give to travellers, Dr. S., says, access to the wast terra incognite of Africa, where, it is supposed, mineral scalific, vegetable production, animale, and perhaps farms of civilization, exists, as yet unknown to the rest of the world. Of course, Mr. Borden has seoured letters paters."

MONUMENT TO ROBERT PULTON. There is to be a magnificent monument built on the banks of the Ohio river to the memory of the illustrious Fulton. The site was one owned by himself, he having become possessor of it by a patent from Government, and it is a most beautiful and appropriate spot. It is on a high bluff on the east Bank of the Ohio, near the new manufacturing town of Cannelton Indiana. All Mechanic institutions and associations are to be invited to contribute a block of stone towards the structure, with appropriate inscriptions. Daniel Webster has been insited to by the corner stone on the 4th of July next.

New York is a great place for pegple living under ground. A table is published showing that 18,456 of the inhabitants of that city live in cellars or basements, and the mass of them in " lots" of five in a room.

Quite a sensation has been produced in Burholomen, to , in crisequence of sundry specimens of ore being found containing small particles of gold.

The Daily Rews. NEWPORT

BY CRANSTON & NORMAN, 127 THAMES STREET.

THURSDAY MORNING, APRIL 18, 1850.

its Persons who intend visiting a watering place this summer cannot secure a more healthy spot than Newport ; here they will be located within a flaw hours ride or sail of New York and Boston,they will breathe a pure air, enjoy a cool breeze all the time, and have every luxury which thuy can desire. In regard to health, we are bold to say that we challenge the residents of any other place in America to and along the restore at oracle while work compare at all favorably with Newport, for its salutarious air and generally healthy climate. We do not merely make an assection, and ask the public to rely on this; but we use prepared to province statistics, and we will show, by the most incontrovertible facts, that at all sersons of the year, and particularly when diseases of all ; kinds prevail in almost all other places, Newport is not only quite fron from sickness, but that there is a most extraordinary degree of health prevailing here. During a period of nine weeks, last summor, when almost every place was afflicted with far more than ordinary sickness, aside from the Cholera, which was raging everywhere, we had but five deaths in thes lown; two of those had been cripples for yours, and died from no particular disease, but a mere wearing out of nature, -- and the othet three were infants. Neither was there much sickness ; all our physicians had a comparatively easy time, and not near employment enough to keep them busy .-We have a periodical population of about nine thousand, and during the last summer there were about four thousand strangers liere, at a time, on an average, during the season. Those came from the chies, where all manner of luxuries were indulged in, as long asit was considered safe, and then people left for the country. During the whole season, people hore gratified their appetites, to the fullest extent, in whatevor they desired; they are all kinds of fruits and vegetables, and were no more abstentions in regard to their diet, than they would have been in mid winter, or at a period when there was no provailing discuse in the country. Yet, there was not a case of Cholera in Newport, or anything which at all approximal it. All

were healthy and heavy, and all felt safe. People in the cities and different parts of this country, who intend going to a watering place this summer, will do well to connider these thinger or tender's service to the public, should call attention to this matter, and repeat the facis which we have stated. In Newport, we have the finest and largest Hotels in the country, all of which are kept in the best style ; we have any quantity of private boarding-houses, both in the town and just out of it; there are plenty of private houses, ready fornished; to let; we have the hest bathing in the world, delightful fishing, phyrious rides, an almudance of monsements, good clumbles and excellent preaching, the most skillful physicians,---and, in short, everything which can be desired for coinfort and pleas ure. Steamere are constantly running, so that we are in daily communication with all the principal places of the Union. Mark what we say, Newport is to be the great watering place this summer.

GENTLEMAN MISSING .-- Mr. Edward Monte, of Newport, R. I., a highly respec-table gentleman, left the Aster Hause of this city on Tuesday afternoon the 9th inst , between one and two o'clock, intending to go to Orango, Now Jersey, by the 4 o'clock train of that afternoon, and has not since been heard from. It is supposed that he was suddenly taken. ill, and may not have been able to inform his friends of his situation. It is also possible that he missed the regular Orange train of cars, and being an enure stranger on the road, entered by mistake the cars going to Elizabethtown, Rahway and New Brunswick, at either of which places he may be lying sick.

afor to the advertisement columns, which offers a liberal reward for any information concerning Mr. Moore, and gives a full description of his person. Jersey City, Newark, Elizabethtown, Rahway and New Brunswick papers will please copy this notice, and the adverti-ement, and their bills for the service will be paid on presentation to Mr. Healtsher .- Com.

We left New York Tuesday evening, and up to that time nothing had been heard of Mr. Moore; his wate arrived in the eny Ruesday morning, and during the day his trank, which he left at the Aster House, was broken open, and in it was found about \$1,500, which it was known he had in his possession. There is something very mysterious about this matter; he has either been taken ill, as he has been subject to vertige the last year, occasion he has been foully dealt with. Every effort is being made to obtain information in regard to him, and we trust that he will be found

THE CUBA EXPERITION: III is stated in inconati and Louisville papers that large numbers of men traver been enlisted in those cities and neighburhood for a propased expedition against Caba. They were engaged for one year, and large pay promised. They had only been informed that their destination was Chagres. The New Orleans Bulletin, on the contrary, says :- "We have no ther seen or heard of anything which affords ground for the beliet of such an expedition being of foot."

DEATH FROM INTENTERANCE.-- The Corners Jury in the case of Mr. Wilson, whose sudden death at Washington we have already announced, rendered the following verdict :

"That the deceased was a man of inemperate habits, and had been, for two weeks provious to his death, constantly under the influence of ordent spirits, and on the night proceeding the murning of his death he manifested strong symptons of delirium tremens, and while in that state, about 10 o'clock at night, he was instried and retired to had about 11 o clock; that aiter he gut in bed, he exchanged a few words with his wife and then feit asleep, and was found dead in his hell on Thurs

and was found dead in his bed on Thursdry more dry about daylight; and the Jury
believe, from the evidence, that the deceased
came to his earth by cangestion of the
brain and stonately, produced by the habitual use of intoxicating drocks."

NEWPORT, R. I. April 10th, 1850. A Mystemous Circumstance.—No. explanation has yet been given, nor do we helieve it ever can be given, of the fact sworn to on Webster's trial by Miss Buzzle, a female relative of Lattlefield, that, on the Priday afternoon of the murder, Littlefield was talking of the disappearance of Dr. Parkman! The witness swore positively to that fact, and her testimony was not shaken in

the least by the cross-examination .-

Genthmar :— Happy and I to inform you of the woodly fall effects of Coletti's Savenparilla up on a little daughter of core, who was poisoned, when at the age of alex? Here your, by recombinations of the skin covered her whole body for more than twelve months, distributing the most offers to matter. We were coupled for months to oblige our little sufferer to worr unitems while help from tearing bed feels. But even with these permanents at the hands and feet so as to prevent her from tearing bed feels. But even with these permantions, she would, at times probage the rands and then somether mittens about the finger ends, and then some nearly restored to health, having used no officer medicine for the last two years than Contest's Saraparilla. The effect of this powerful alternative is must signal, seeming to cleans the whole system and realistical disease. The skin of our little girl in now fair as then of infancy, and her system rapidly changing from immity and disease to perfect health, and this know to be the result of the ure of Cerbett's Saraparilla and the same to perfect health, and this know to be the result of the ure of Cerbett's Saraparilla only.

SYRUP OF SARSAPARILLA.

This medicine has proved to be most valuable in the following discoses; Chronic Inflamation, Jaumdice, Waakners of the digestive Organs, Dyapepsia or Indigestion and Sourness of the stonach. Rheumatism and Sat Rheum, Functional disorder of the Liver, Chronic Frapianasaf, the Skin, and all Serietions Discases. Also it is bound to be an invaluable remedy for the Erysipelas, and that discressing disorder, the Asthma. It has proved bigbly beneficial in some cases of Dropay, Dysentery, Diarrhum.

It will be found-by observation that many of the above disorders, and also that fatal diseases. Pluthis Pulmonalis, or Consumption, generally originate in a serochloris state of the system; and to core such diseases, we must remove the primary causa. It will likewise be found that diseases of the Liver often originata will persons of a scroting on his properties of the liver complaint, and are called liver complaint; but it is a well established fact that before such liver complaints can be permanently cured, this serofulous distincts must be removed.
